14 SUPER MARIO MAKER 

onscreen grid – much like the graph paper used to design stages for the original Super Mario Bros – acting as a useful guideline, while lending the procedure a rare sense of precision.

You can customise your palette to bring your most commonly used items to the top, while squeezing the triggers or bumpers allows you to quickly and easily copy objects or move level furniture in bulk. The different palettes and styles allow you to transform a stage in mere moments: a Super Mario World airship stage can become a New Super Mario Bros U castle with just a couple of taps.

LET'S TAP

Its solutions to the most obvious problems are often disarmingly simple, like the trail of Marios that traces the arc of his jump, telling you the perfect place to put down that next platform – or, for the more devious minded, an enemy to ensure an unhappy landing. From planning to execution, the whole thing feels

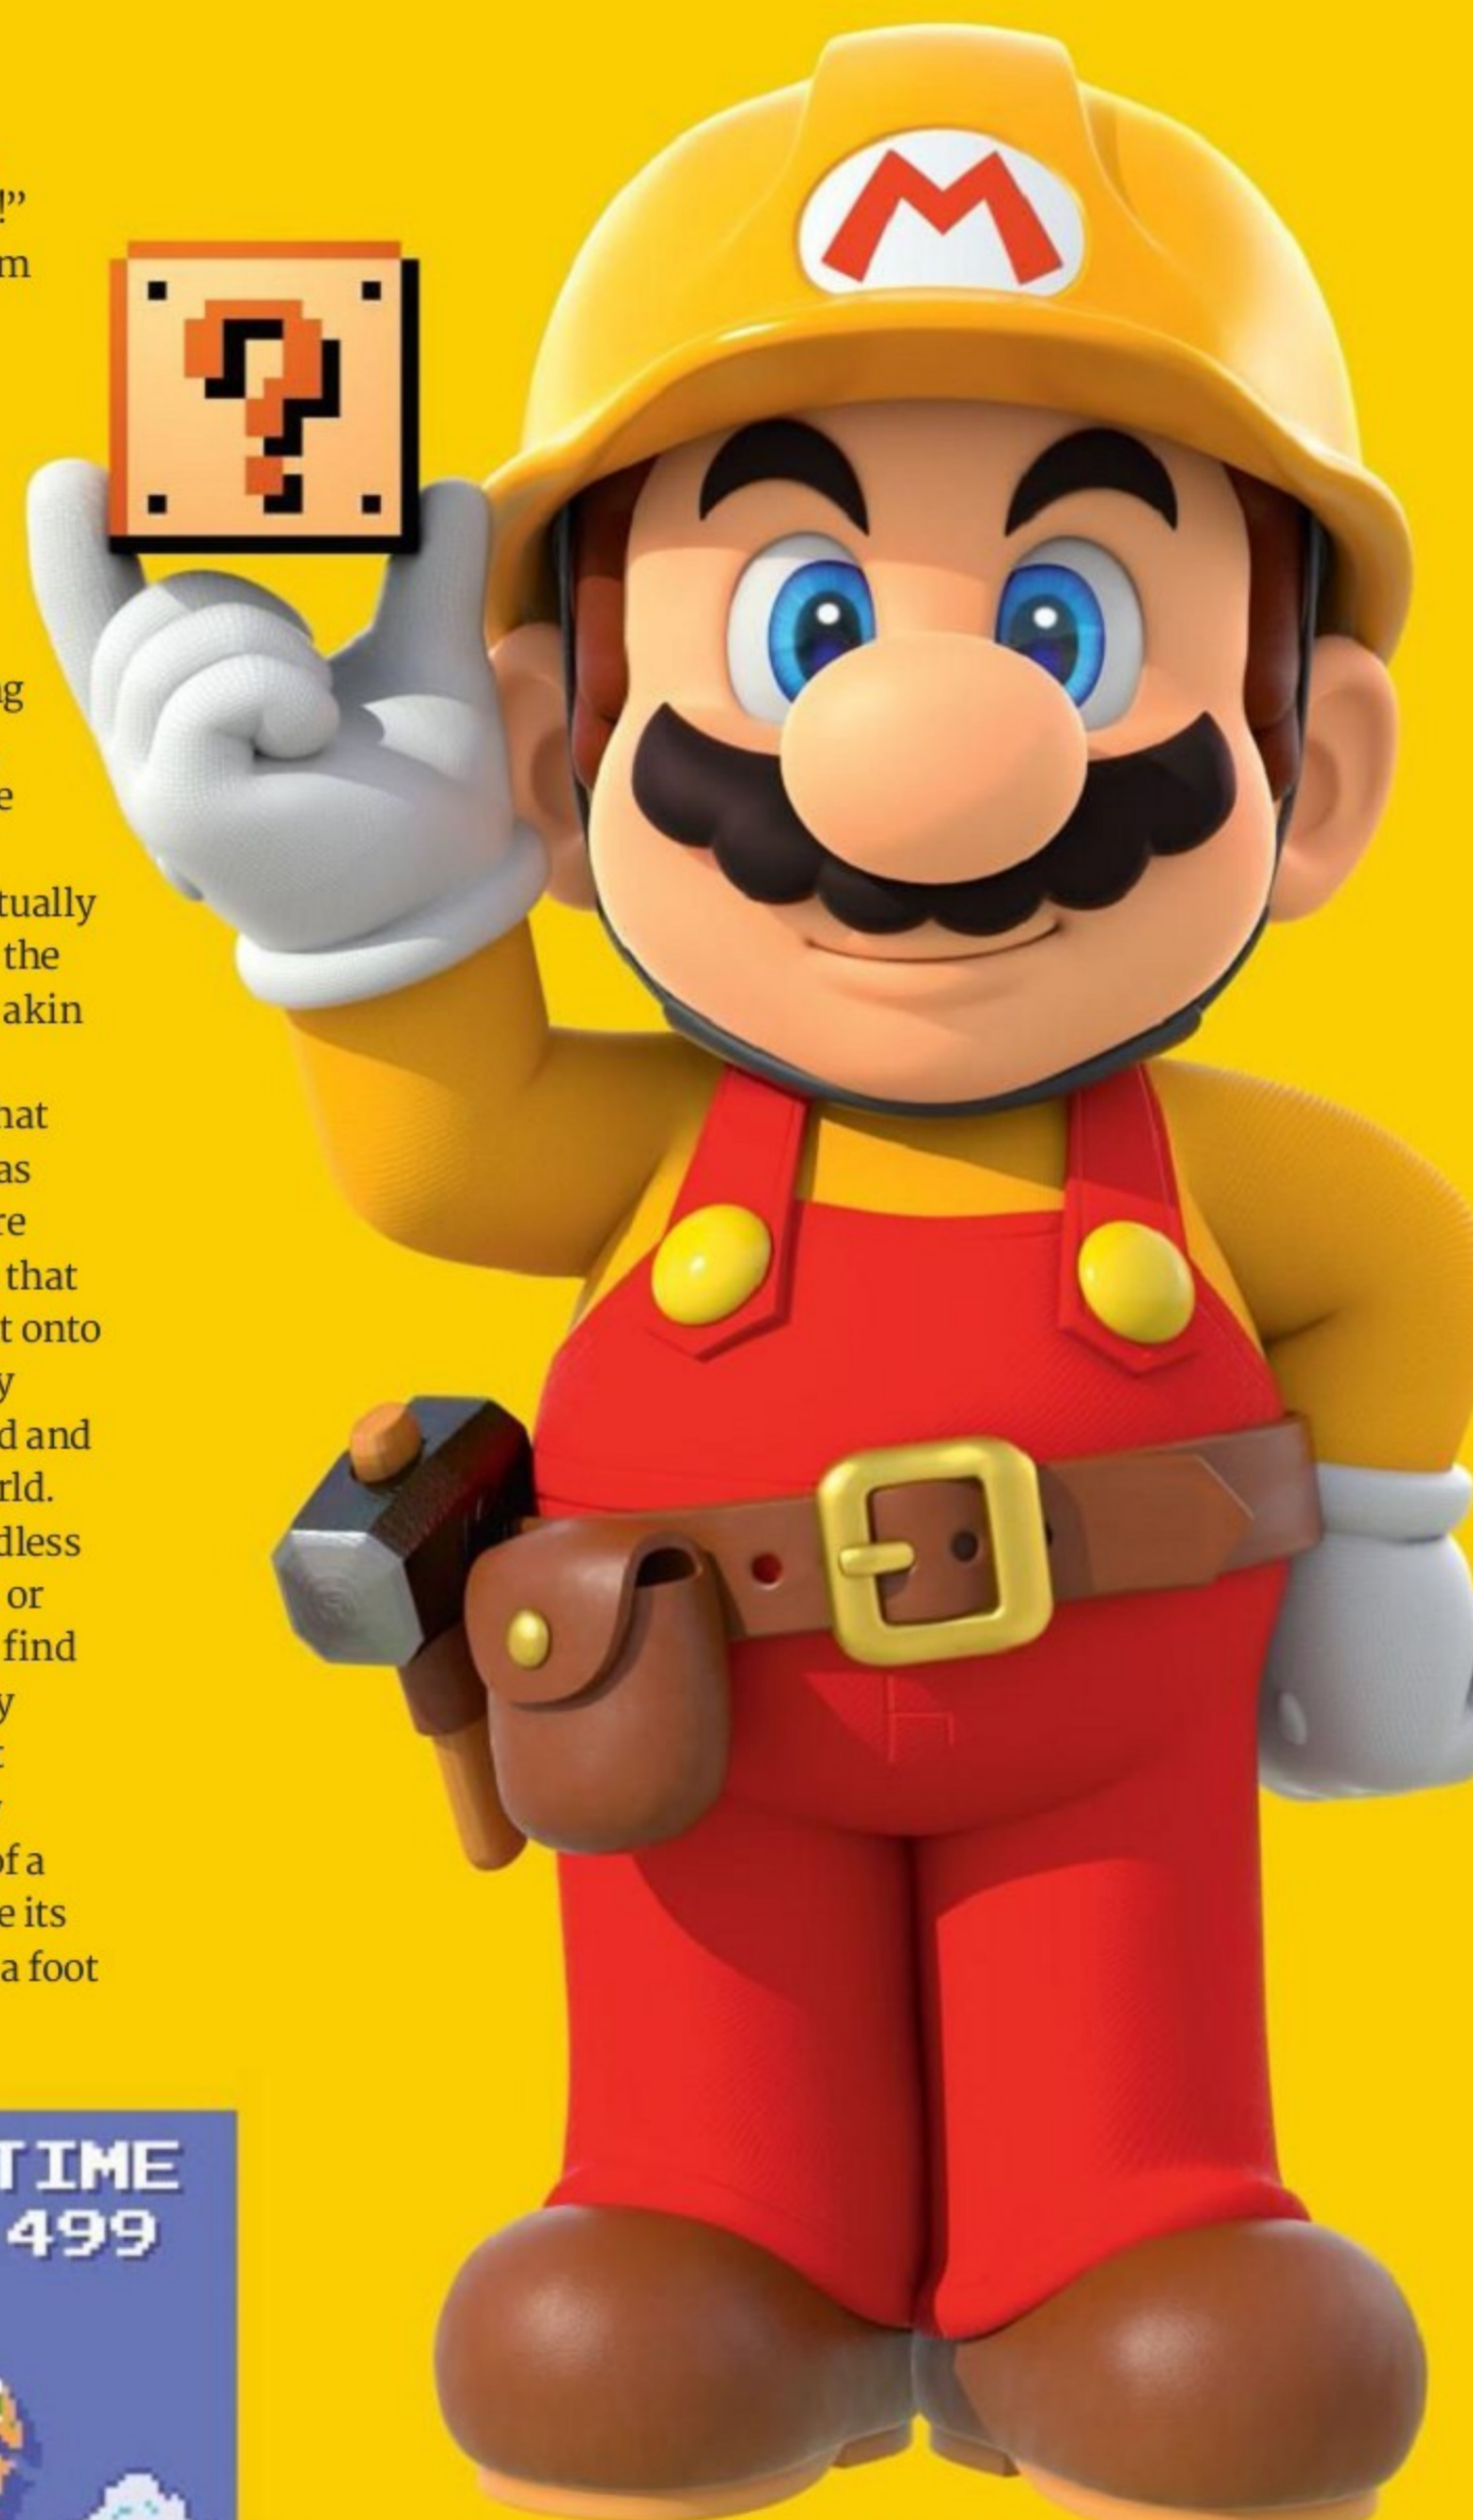

like blocking a scene as a film director before yelling “action!” How fitting that switching from building a level to playing it merely requires you to tap the clapperboard in the bottom-left of the screen.

But the real genius of Super Mario Maker is that it makes the course design process fun. Elsewhere, putting stuff together is often tedious, laborious, or both: having done something is always more enjoyable than the effort of actually doing it. Here, Nintendo turns the act of creation into something akin to a performance.

Some will be disappointed that most of the stages Nintendo has included are designed to inspire rather than challenge, though that unselfishly shifts the spotlight onto user creations, which are easily shared, and intelligently sorted and highlighted within Course World. Whether you consider it an endless source of creative stimulation, or

simply a place to find new levels to play every day, it's yet another expertly judged element of a package that, like its star, hardly puts a foot wrong. 

“THE DIFFERENT STYLES ALLOW YOU TO TRANSFORM A STAGE IN MERE MOMENTS”

GOLDEN JOYSTICK PRESENTS... 101
